

Rivers of Bangladesh

Metadata

ISPAN (Irrigation Support Project for Asia and Nearest) captured the rivers that were equal to or above 50-meter width, from SPOT multi spectral image 1989, EGIS- I updated this data layer using SPOT multi-spectral image and EGIS-II enhanced the existing data adding Model and some other Major rivers. After-wards, NWRD has captured detail rivers including Chittagong region from LANDSAT TM image 1997.in 2013, NWRD again updated river system using LandSat 2010 image. Others attribute information were incorporated from BWDB, BIWTA and SoB
